## **DETAILED ACTION**

### ***Allowable Subject Matter***

Claims 1, 3-4 and 8-14 are allowed.

The following is an examiner's statement of reasons for allowance:

The prior art of record does not anticipate nor render obvious to one ordinary skilled in the art a high-pressure discharge lamp comprising various elements as claimed, more specifically, an enclosed spheroid bulb and a wound portion that is wound substantially spirally at least 0.5 turns in a range from a 2nd reference plane to a 3rd reference plane, and a closed loop around one of the light emitting part and the first sealing part does not exist within the range, where the 2nd to 3rd reference planes are parallel to a 1st reference plane lying orthogonal to a bulb longitudinal direction and including an end of the discharge space positioned directly at a section, having a greatest curvature, of an inner surface of the light emitting part at a base portion of the electrode nearer the first sealing part, the 2nd reference plane being distant 5 mm from the 1st reference plane along the first sealing part and the 3rd reference plane passing through a tip of the electrode nearer the second sealing part, and the wound portion and the lead portion are without a closed loop within the range between the 2<sup>nd</sup> reference plane and the 3<sup>rd</sup> reference plane.

As pointed out by the Applicant in the arguments filed 12/22/2010, the prior art of record does not teach or disclose a spheroid bulb (page 7) and one of ordinary skill in the art would not be motivated to apply the trigger wire of the prior art in combination with a reference with a sealing part that is sealed solid for the reasons stated on page 11 of the arguments.

Art Unit: 2889

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Claims 5-7 are allowed. Claims 5-7, previously withdrawn from consideration as a result of a restriction requirement, require all the limitations of an allowable claim. Pursuant to the procedures set forth in MPEP § 821.04(a), **the restriction requirement between a product and a process of use, as set forth in the Office action mailed on 6/11/2009, is hereby withdrawn** and claims 5-7 hereby rejoined and fully examined for patentability under 37 CFR 1.104. In view of the withdrawal of the restriction requirement, applicant(s) are advised that if any claim presented in a continuation or divisional application is anticipated by, or includes all the limitations of, a claim that is allowable in the present application, such claim may be subject to provisional statutory and/or nonstatutory double patenting rejections over the claims of the instant application. Once the restriction requirement is withdrawn, the provisions of 35 U.S.C. 121 are no longer applicable. See *In re Ziegler*, 443 F.2d 1211, 1215, 170 USPQ 129, 131-32 (CCPA 1971). See also MPEP § 804.01.
